2021 to 2023

Boeing Distribution Services (BDSI) Project - WMS Manhattan System Admin

- Worked on resolving tickets on daily basis.
 - Problems included issues with orders moving within warehouses.
 - Involved in resolving P1/P2 incidents and documenting them.
 - Documenting resolutions and problem analysis of P1 and P2 incidents.
 - Worked with SQL to write and run queries to pull required data for orders and to resolve any issues.
 - Mentored freshers for 8 months in WMS Manhattan.
 - Conducted multiple KT sessions based on General problem solving in WMS and P1/P2 ticket analysis and mentoring sessions for freshers.
 - Worked on an automation programming to conduct QA testing for WMS orders; Automation program was made in Cucumber (coded in Java). and it was hosted as a web application so QA tester can run multiple tests with multiple order to see if any issue is flagged for the SDN deployment.
